INTRODUCTION

WHAT IS PUBLIC SERVICE

Public Service refers to any work or activity that is performed for the benefit of the public, with the primary goal of improving the welfare of the community or society as a whole.

Public Service can take many forms, such as working in government agencies, non-profit organizations, or volunteering in community-based initiatives.

* Public Service Can encompass a wide range of fields and professions, including health care, education, law enforcement, social work, public administration and more.

* Those who work in public service are often motivated by a desire to make a positive impact on their communities and to help those in need.

* In many countries, public service is viewed as a crucial component of a healthy and functioning society, and governments may provide incentives or support to encourage individuals to pursue public service careers.

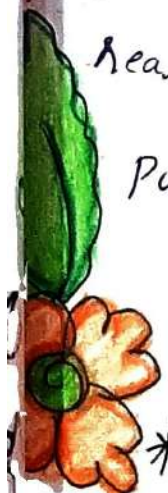

Well Done

Public Service Can also offer a rewarding and fulfilling career path, as it allows individuals to make a meaningful difference in the lives of others and contribute to the greater good.

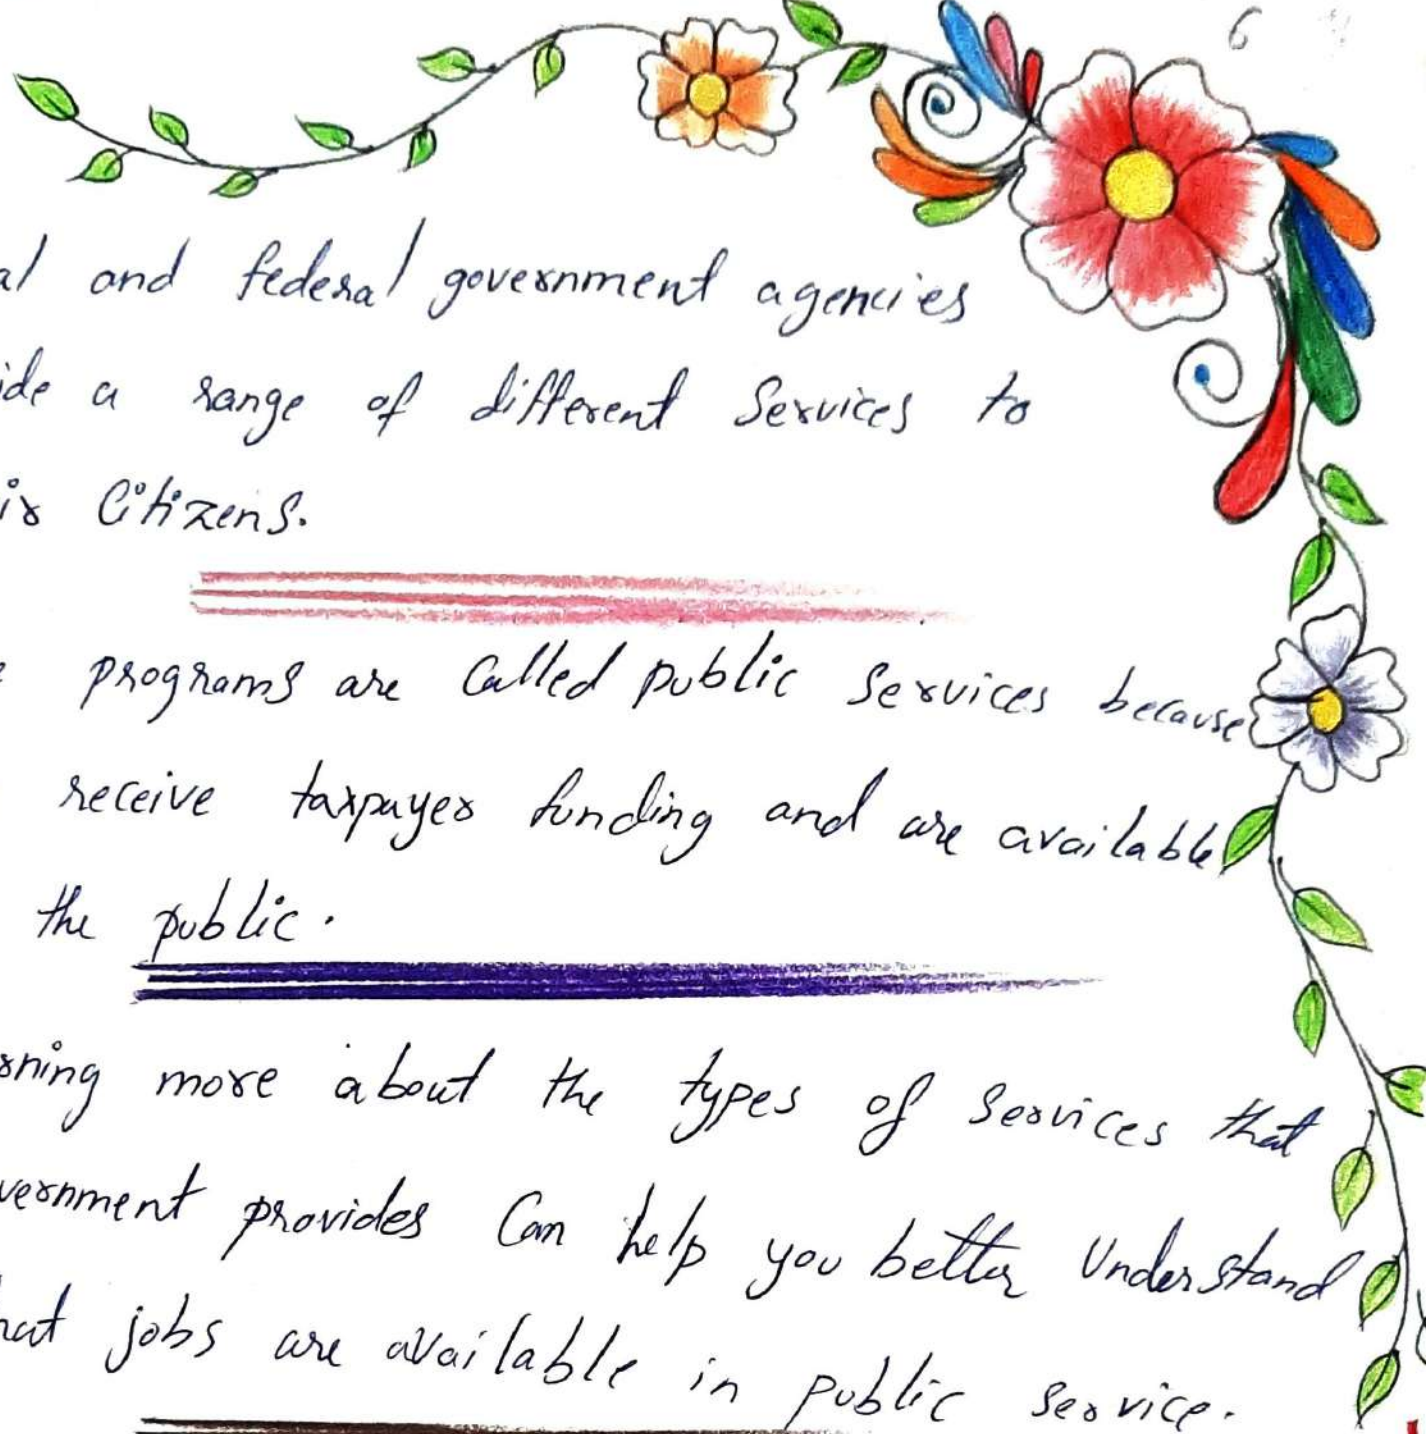

Public Sector Economics examines the impacts of government revenue, expenditure, and investment decisions. Areas of emphasis include tax policy, education, transportation, poverty and welfare, delivery of public services, and economic development.

They have four defining characteristics. They exist for reasons of policy, they provide services to the public, they are redistributive, and they act as a trust.

* They consequently operate differently from production for profit, in their priorities, costs, capacity and outputs.

6

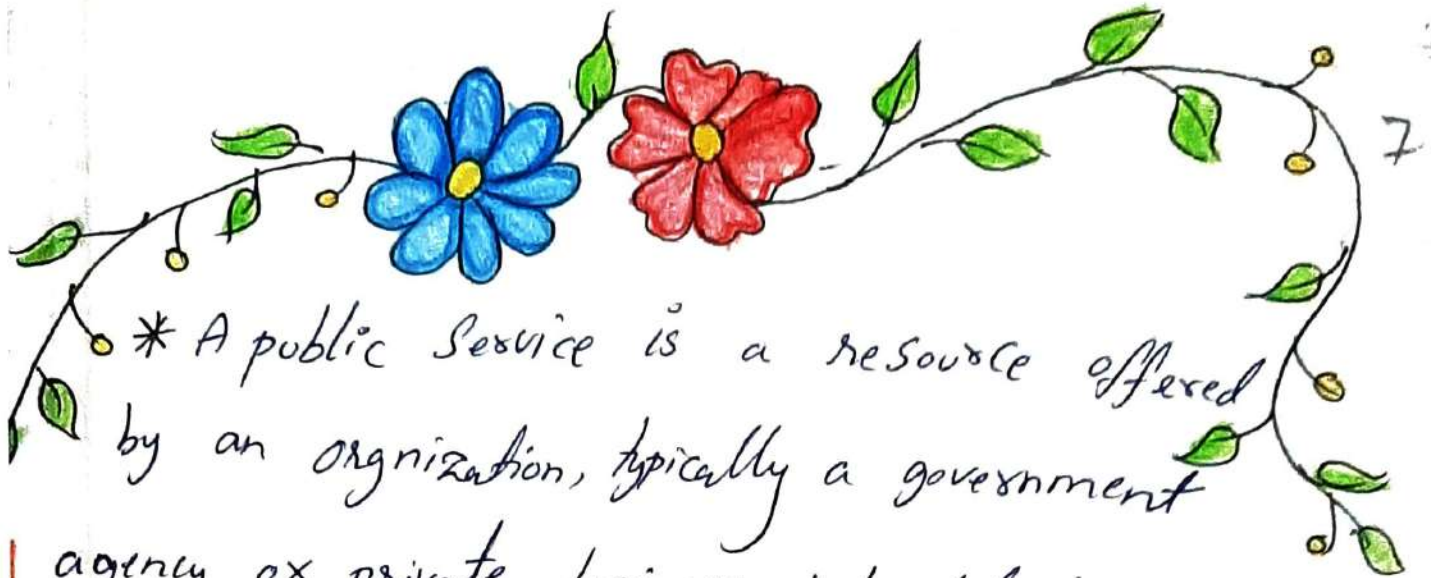

local and federal government agencies provide a range of different services to their citizens.

These programs are called public services because they receive taxpayer funding and are available to the public.

Learning more about the types of services that government provides can help you better understand what jobs are available in public service.

IN this article, we explain what a public service and list 23 common public services with descriptions.

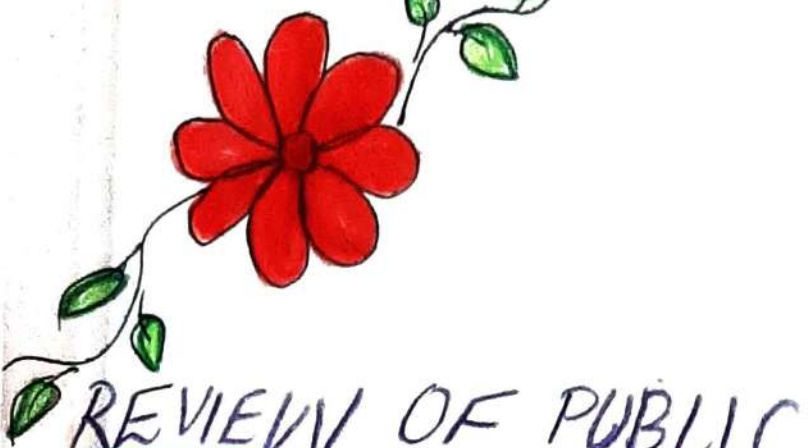

* A public Service is a resource offered by an organization, typically a government agency or private business, intended to support members of a Community.

Public Services include health care, waste removal and transportation, and are systems and solutions that can benefit various groups of individuals.

The government may offer these services itself or offer funding to a private organization to provide them to Community members.

For example, independent contractors handle waste removal services, although the jurisdiction finances this public service.

RESEARCH METHODLOGY

REVIEW OF PUBLIC SERVICES BY REFERRING:

from Books, Internet, newspaper, etc...

We got the information of Public Services

HealthCare, Education, Law enforcement,

Social work, public administration and more.

FIELD

REPORT

AND

FINDINGS

we went to field visit like " TalabKatta , Railway Bridge etc.

we saw that in every house there is one problem the problem is that water is in bad smell.

We observe that in this

- Project is Public Service is help to the everybody Citizens in our society and solve their problems like water problems , garbage problems and electricity problems etc.

FIELD

12

REPORT

field Report about public Service

there are five rules are there:-

- 1th high ethical standards, integrity and honesty.
- 2th political neutrality.
- 3th Promoting of the principles of merit, fairness and impartiality in the discharge of duties.
- 4th accountability and transparency, responsiveness to the public particularly to the weaker section.
- 5th Courtesy and good behavior with others.

EDUCATION

✦ Many Countries throughout the world offer education to their Citizens as a public service. the goal of public education is to provide schooling to children of all backgrounds free of charge. In order to do this, government fund schools using taxpayer money. Although systems are different throughout the world, most public schools serve children in primary and secondary school from the ages of 4 to 18. while many countries have national education agencies, local authorities manage most public education.

TELECOMMUNICATIONS

Telecommunications refers to all the systems of communication that use electromagnetic technology to transmit signals. These technologies are a vital part of the modern world and include telephone, internet, radio and television systems. Some government agencies provide these services to their constituents through publicly funded infrastructure.

it's a
new thing
you added
very
good

MILITARY

15

Military forces are one of the oldest known public services and are part of almost every national government in the world. They are organized, professional fighting forces whose primary goal is to protect citizens from foreign and domestic armed threats. Military forces may also participate in peacetime projects like construction, disaster relief and security work. Although every military force is different, most have at least three branches, including an army, navy and air force.

ENERGY

16

Energy is one of the most important services that government agencies provide.

It ensures that citizens have the ability to heat, cool and light their homes, power their appliances and complete tasks more efficiently.

The most common energy service that governments provide is electricity, which they may produce in fossil fuel, hydroelectric or nuclear plants or through wind and solar powered processes.

LAW ENFORCEMENT

Law enforcement is a common public service that many governments provide at the local and national levels. The primary goals of law enforcement are to protect citizens from criminal activity, prevent future crimes, conduct criminal investigations and penalize criminal offenders. In order to accomplish these goals, governments organize law enforcement agencies for different jurisdictions. Most law enforcement agencies exist at the municipal or country level, although some serve entire countries and work to combat large-scale criminal threats.

18
PUBLIC

TRANSPORTATION

Many states, Counties and municipalities offer their Citizens publicly funded transportation Options. This may include buses, rail lines or subway systems. Public transportation is especially important in Urban areas with Low Car ownership and high population density. It Can give everyone access to transportation, allowing them to go to work and complete daily errands, and Can reduce environmental impact from Cars.

URBAN

PLANNING.

Urban planning is the process of developing and revitalizing urban areas. It often includes elements such as land and water use, environmental and social impact planning, construction and infrastructure are most often responsible for urban planning and commonly work to expand housing, plan developments, revitalize decaying areas, introduce green technologies and increase community access to essential services.

WASTE

MANAGEMENT

Waste management is the process of tracking, organizing and removing waste from its inception to its disposal. This process helps ensure that communities remain safe and sanitary and that professionals discard and destroy all types of waste and garbage properly. The four primary categories of waste include industrial waste, municipal solid waste, hazardous waste and agricultural waste. Waste management can help reduce the effect of these items and materials on the natural environment, and ensure that certain materials become recycled or reused, such as glass, cans and paper.

RECCOME-
-NDATIONS
SOLUTION OF
ABOVE
PROBLEMS

CASE 1:

22

How did Hyderabad tackle the water problem?

Paavleen Begum said that. In its first term, the TRS government took up a Rs 2,000 crore drinking water scheme in all municipalities and corporations around Hyderabad. The first phase of the ORR drinking water the foundation stone was laid on Monday for the second phase at Rs 1,200 crore.

CASE 2:

who are eligible for free water in Hyderabad?

Ghouse Bhai said that In a step to fulfil Poll-promise in Telangana, the State Government is providing "free" water supply to all domestic consumers up to 20,000 litres [20 KL]. Domestic-slug Domestic Individual, Domestic - Multi storeyed Building [MSB] / Bulk connections are eligible for 20 KL [20,000 litres] free water supply.

CASE 3:

23

Are the municipality allowed to cut off your electricity?

Mahmooda Begum said that The Municipality is legally obligated to give a notice to the person responsible for the account, A minimum of 14 days written notice of termination is required for water and electricity accounts in arrears and if the notice period is shorter than 14 days, or not supplied, the disconnection is illegal.

CASE 4:

What happens if you don't pay municipal rates?

Abdul Kareem said that Termination of electricity supply by a municipality. Accordingly, a municipality may terminate the supply of electricity as a result of arrear rates and taxes. This may be the position even if the electricity account up to date.

CASE 5:

24

What is the problem about garbage?

Basheer Ahmed Said that Burying garbage also causes both air and water pollution, and simply transporting it to the sites consumes an increasing amount of valuable fossil fuels, which produces more pollution and other problems. Buried in a landfill, the typical plastic trash bag takes 1,000 years to degrade, giving off toxins as it does.

CASE 6:

What is the biggest problem with garbage?

Mohd Abdul Jameel Pollution of Soil: waste can leak hazardous chemicals into the soil and from there into our food. Air pollution: The burying of waste at landfills release toxic substances into the air, including extremely poisoning toxins. Pollution of oceans: 13 million tonnes of Plastic end up in the world's oceans each year.

CASE 7:

25

What is the reason for garbage?

~~Abu~~ Abubaker said that there are many reasons for the production of garbage. One reason for this growing urbanization and prosperity. The more financially strong is the country or the city, the more garbage it will produce. It can also be seen by linking poverty and prosperity, competence and inefficiency.

CASE 8:

What is the problem of garbage pollution?

~~But~~ Saad said that Garbage is hazardous to marine life and other users of our waterways. Marine animals and sea birds can mistake plastic material for food, and often end up dying a slow and painful death from starvation or strangulation.

CASE 9:

How garbage affect our life?

Zain said that Directly or indirectly, waste affects our health and well-being in many ways: methane gases contribute to climate change, air pollutants are released into the atmosphere, freshwater sources are contaminated, crops are grown in contaminated soil and fish ingest toxic chemicals, subsequently ending up on our dinner.

CASE 10:

How does garbage damage the environment?

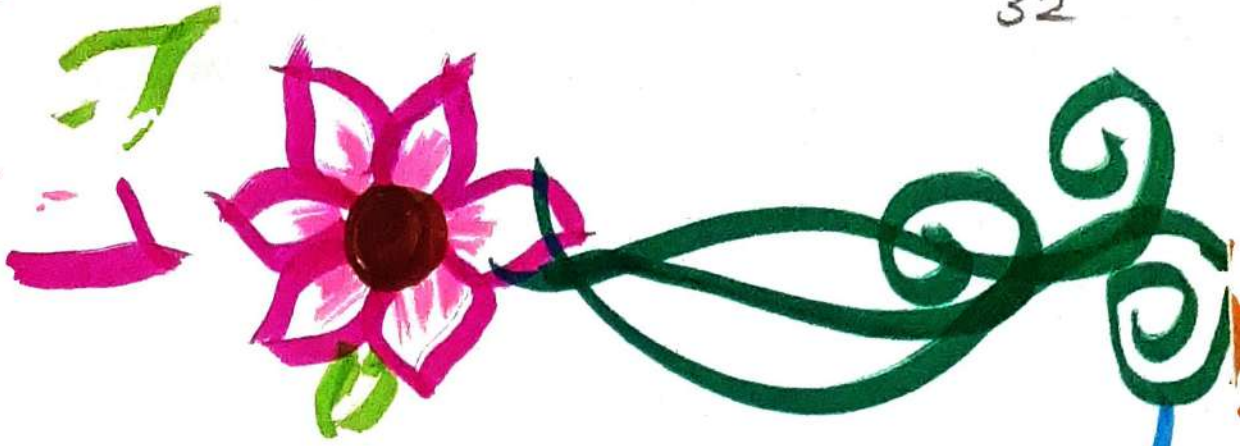

Asma said that Trash can travel throughout the world's rivers and oceans, accumulating on beaches and within gyres. This debris harms physical habitats, transports chemical pollutants, threatens aquatic life, and interferes with human uses of river, marine and coastal environments.

CONCLUSION

I Concluded that in this project is Public Service refers to any work or activity that is performed for the benefit of the Public, with the Primary goal of improving the welfare of the Community or Society as a whole. Public Service Can take many forms, such as working in government agencies, non-profit organizations, or volunteering in Community-based initiatives. They consequently operate differently from production, for profit, in their priorities, costs, capacity and outputs.

Local and federal government agencies provide a range of different services to their citizens. These programs are called public services because they receive taxpayer funding and are available to the public. Learning more about the types of services that government provides can help you better understand what jobs are available in public service.

LETTER

Place: Hyderabad

Date:

To,

The Municipal Corporation of Hyd.TS.

Subject:

Respected Sir,

My self Habeeba Fatima, Studying
in Class IXth, in Schlor's Model High School
Cova Organisation Public Service, Surroundings
Neighbour's, I am from Hyd. Yakutpura
chowni. Wade ali baig, Survey from door to
door and shops. To solve Public Problems.

The Issue is that bad smell is coming from
the water and water is not good and dr.
water is less and not coming regular
in the society.

Public Problems:- Our survey at slum area in old City many people say they are suffering from water borne diseases In this area Tap water is not good quality Tap water supplies alternate days water is contaminated It gives of bad smell & impure. In same areas no water supply people used Borewell water They used to buy 20 rupees for 10 liter water container for drinking.

In Slum areas poor electricity supply. - Every day 2, 4 hours daily electricity shutdown No, proper street lights. Same time very high voltage & low voltage it may damage electric appliances = fridge, washing machines, T.V., Bulbs, Ceiling fans. etc.

Most of the area is covered with dirty Garbage and bad smell NO proper Dust bins, MCH workers are not coming regularly. They come Twice in a week. Large Roads and streets areas are Contaminated with Garbage like fast garbage, vegetable garbage and dead animal bodies, ~~etc~~ Hazardous waste like plastics etc.

Contaminated water and poor Sanitation are linked to transmission of diseases such as Cholera, diarrhoea, dysentery, hepatitis A, typhoid and polio. Absent, inadequate, or inappropriately managed water and Sanitation services expose individuals to preventable health risks.

A report of more a a poor people of a village
that cannot be found in the present
reports like agriculture and which also causes
poor the children, children, dysentery, typhoid
and polio etc. that kill more than 500,000
people world wide every year I describe
list out what I expect the politicians &
officials to do to address the issue are
to help the people for better life. daily life
problems water and electricity, proper drainage
connection.

Thanking you,
Yours Sincerely,

Very good

Habeeba Fatima
