Report

A study on government hospital in relation to cleanliness, facilities available and their drawbacks.

Government Hospitals

Hypothesis

We assume that now-a-days government hospital are focusing more on cleanliness, they are giving more facilities to the citizens, despite having few drawbacks.

Related Studies:

The result of this study are consistent with studies by Kara Hanson and Barbara McLean, where in their study they also showed that by the patient's perspective.... The ultimate purpose of the hospital visit is the quality of service and examination, where patients are willing to wait longer or pay higher costs to get best services.

GOVERNMENT HOSPITAL

Introduction

A government hospital is a hospital which is owned by a government and received government funding.

This type of hospitals provide medical care free of charge, the cost of which is covered by government reimbursement. These hospitals are funded by the central government state hospital are run by state government and may be dispensaries, district hospitals or medical college hospitals (hospitals with affiliated medical college).

Focus Area

1. Cleanliness.
2. Facilities Available.
3. Drawbacks.

1. Cleanliness.

Introduction:-

Cleaning is an essential part in helping to reduce the risk of infection in hospital and providing a clean and safe environment. All the areas within the hospital should be safe, welcoming and comfortable to patients to feel reassured when they visit the hospital and to ensure that the standard of cleaning are met at all times.

Disposal of waste:

Bio medical waste management

Black Bag:

Carbon needles
without syringes
Blades sharps
All metal articles

Blue Bag:

all type of glass bottles
Broken glass articles
out dated, discarded medicines

Yellow Bag:

Infection waste, Bandages, gauze, cotton or any other object in contact with body fluids.

Red Bag:

plastic waste such as catheters, injection syringes, tubing, iv bottles.

STANDARD PRECAUTION

1. Wet hands with water.

2. Add soap and rub briskly to the lather.

3. Rub hands, wrists and under finger nails for atleast 25 seconds

4. Rinse hands under running water

5. Dry with paper towel.

6. Turn off tap with towel on both sides of hands.

USAGE OF MASK & GLOVES.

Masks:

A mask is an object normally worn on the face, typically for protection, disguise and spread. Injections masks have been used since antiquity for both ceremonial and practical purposes.

Gloves:

Gloves help keep your hands clean and lessen your chance of getting germs that can make you sick.

wear gloves every time when you touch blood, bodily fluids, bodily tissues; mucous membranes, or broken skin. you should wear gloves for this sort of contact even if a patient seem healthy and has no signs of any germ.

Disinfection:

The process of cleaning something, especially with a chemical, in order to destroy bacteria by using sanitizers are substances that simultaneously clean and disinfect. which is used in dental surgeries, wards, bathroom to kill infectious organisms.

Auto Claving.

Auto claving

Auto claving is for sterilizing and disinfecting the medical devices / equipments in hospitals / laboratories, the auto clave is the preferred equipment. Auto clave uses moist heat for sterilizing medical equipments and surgical instrument.

Many auto claves are by subjecting them to pressurize saturated for around 15-20 minutes depending on the size of the load and the content.

Disinfectants.

Disinfectant are nothing but antimicrobial agents that we apply to the surface of non living objects to destroy microorganism that are living on.

Some disinfectant products:

1. clorox health care bleach.
2. Germicidal cleaner.
3. Distol clean room.
4. formalhyde, paraformaldehyde.
5. Glutaraldehyde.
6. Zephiran.
7. Hydrogen peroxide.
8. monoperoxid succinic.
9. chloroxyperdenzoic acid.
10. peracetic acid.

Disinfectants.

Facilities:-

Chief Minister K. Chandrababhan Rao has given his green signal for constructing of four new 1000 new bedded multispeciality hospitals in GHMS limit

KCR plans to encourage deliveries at Government hospitals by announcing that the state government will sanction Rs 13,000 to a girl child and Rs 12,000 to a boy child.

KCR announced that the much awaited KCR kits scheme will be implemented from

Saturday, starting with pelaburi hospital

KCR kits for over 2.5 lakhs pregnant women in Telangana to be distributed on June third.

KCR launches free eye testing programme in Telangana in hospital and its became profitable to 3-70 Crores of population

Government hospitals and clinics set up maintenance procedures and preventive for managing health care and hospitals facilities and equipment in the following areas.

Public Health System in the Colonial

- ① Dental facilities
- ② ward
- ③ minor OT.
- ④ OPD
- ⑤ physiotherapy
- ⑥ laboratory services
- ⑦ ECG services
- ⑧ pharmacy
- ⑨ Radiology
- ⑩ indoor facilities

Pics

Drawbacks of Govt Hospitals

Drawbacks to india's public health system today include low quality care, corruption, unhappiness with the system, a lack of accountability unethical care, overcrowding of clinics, poor co-operation between public.

- Doctors are not quite qualified
- Sanitation problem
- ambulance, doesn't arrive on time
- lack of proper communication
- proper medical checkup is not available
- Staff is irresponsible
- they work in rough way.
- No safe drinking water

News

- ① wards by rape house wife in dark of Osmania hospital in between 200 staff memb.
- ② more than 70 children die due to lack of oxygen in gorakhpur hospital under the Bjp

HIGHLIGHTS OF GOVERNMENT HOSPITAL

100. Do you agree that every thing is having its strength and drawbacks in its own way?

Analysis Of Questionnaire

S.No		Q ₁	Q ₂	Q ₃	Q ₄	Q ₅	Q ₆	Q ₇	Q ₈	Q ₉	Q ₁₀
1.	Sumayya	Yes	Yes	No	Yes	No	No	Yes	Yes	No	Yes
2.	Masrifa	No	Yes	No	Yes	Yes	Yes	Yes	Yes	Yes	Yes
3.	Uzma	No	Yes	No	Yes	Yes	No	Yes	Yes	No	Yes
4.	John	Yes	Yes	No	No	No	No	Yes	No	Yes	Yes
5.	Rafath	Yes	No	No	Yes	No	Yes	Yes	Yes	Yes	Yes
6.	Ali	Yes	Yes	Yes	Yes	No	Yes	Yes	Yes	No	Yes
7.	Amer	No	Yes	No	No	Yes	Yes	Yes	No	Yes	Yes
8.	Qutija	Yes	Yes	No	Yes	No	Yes	Yes	No	No	Yes
9.	Omer	No	Yes	No	No	No	Yes	Yes	No	No	Yes
10.	Atifa	Yes	Yes	No	Yes	Yes	No	Yes	Yes	No	Yes

1. According to the analysis of our questionnaire, we have observed that six members out of ten agreed that they face problems in admitting their patients because of lack of communication in emergencies cases, while four members disagreed that they face problems in admitting their patients.

2. In second question we have observed that nine members agreed that lack of money is a reason for the problems.

3. Nine members said that they haven't utilize the government hospitals correctly where one of them said that he got full of facilities in government hospitals.

4. Seven members said that they think government hospitals are supporting or supported by government.

5. Six members disagreed that government hospital are only for poor people because there is no where mentioned that government hospitals or their facilities are for poor people only but it is for all individual citizens of a country they live in.

6. majority people (six) said that the staff of government hospitals are qualified because they said it's not a cake walk to reach the level the staff is in, where four members mentioned that some of them are disqualified in their behaviour they handle the patients.

7. In seventh question we call with the members who answer agree that government hospitals and private hospital having a huge difference between them. So, all the ten members agree on this point of view.

- 
8. Again in the eight question we asked about facilities but poorly they answer came that few members out of ten said that they won't think the facilities are available in government hospitals.
9. In this question we got to know that six members complain against cleanliness in government hospital. Because they have experienced in hospitals when they admitted they patients.
10. Ten on ten members said that everything is having its strength and dranebacks in its own way.
- 

Analysis

My hypothesis proved right so that government hospitals are focusing more facilities on cleanliness, they are giving more facilities to the citizens, despite having few drawbacks.

CONCLUSION

After careful examination of Case Study and administration of questionnaire, we conclude that now-a-days government hospitals are focusing more on cleanliness and providing services.

However we found few drawbacks which can be overcome by taking required necessary steps.

Acknowledgement

We would like to thank to COVA Institution for giving us such a knowledgeable project and I would specially thank to my teacher and friend who helped me to complete my tough project on time and put their efforts to help us in the endeavour - s last but not least the success and final outcome in an positive way. I humbly thanks to many people to give me a lot of guidance and assistance and we would not forget to thank them for their help.

Suggestions:

- ① Install ~~RO~~ RO+UV water plants for public attenders and patients
- ② Availability of Ambulance in every area should be provided for avoiding the problem of transportation of an emergency cases.
- ③ Best infrastructure should built.
- ④ Passionate, Qualified and Caring Staff should be appointed.
- ⑤ fully secured environment must be provide to public
- ⑥ free health benefits Schemes should be published through Newspapers, T.V, Social media, magazines and pamphlets.

Implementation :-

- * We distributed pamphlets on highlighting the available facilities in government hospitals.
- * We displayed poster on the creating awareness on schemes and facilities available in government hospitals
- * We conducted awareness campaigns to use public health facilities in our surrounding areas.
- * We wrote a letter to state health ministers highlighting the problem faced by patients like lack of cleanliness, rude attitudes of some hospital authorities.

To

The health and family welfare minister
New Delhi, India

From,

Laneez, Inveria and Alkaan
T.M.R.L.S Chaurminar Girls-2.
Shalibanda, Hyderabad

Subject:- complaint regarding lack of
cleanliness in public hospitals
and rude attitude of public
health officer.

Respected Sir,

We the students of T.M.R.L.S Chaurminar
Girls-2, surveyed few government hospitals,
of Hyderabad district. We would like to
appreciate the administration and facilities
available to poor people of our state.

Apart from this, we have observed that
below mentioned issues, which are as follow

- > lack of cleanliness and proper health and
hygiene
- > provision of safe drinking water

→ Irresponsible behavior of administrative authorities in government hospital

We would like conclude that, kindly address the above mentioned issues, at the most earliest possible.

Thanks.

Yours faithfully

Sreezy, Iuveria and Alkan.
