

COVA's Compassionate Citizenship Program Delivers Remarkable Impact on Students, Statistical Study Confirms

Jun 3, 2026

Hyderabad, June 3: A comprehensive statistical analysis of the Compassionate Citizenship Program implemented by COVA Peace Network has revealed significant positive changes in students' social awareness, environmental consciousness, civic responsibility, leadership skills, and community participation.

The study examined data collected through Pre, Mid, and Post surveys conducted between 2022 and 2026 to assess the effectiveness of the program in shaping responsible and compassionate citizens among school students.

To ensure scientific accuracy, researchers employed a range of statistical tools including Frequency Distribution Analysis, Percentage Analysis, Comparative Analysis, Chi-Square Test of Association, Pearson's Chi-Squared Test, Trend Analysis, and Impact Evaluation Analysis.

The findings indicate substantial improvements across multiple dimensions of student development:

- **Social Awareness:** Significant improvement
- **Environmental Consciousness:** Strong improvement
- **Civic Responsibility:** Noticeable enhancement
- **Social Sensitivity:** Increased considerably
- **Community Participation:** Higher engagement levels
- **Leadership Development:** Marked improvement

COVA study finds Citizenship Programme boosts civic awareness among students

A multi-year evaluation of COVA Peace Network's Compassionate Citizenship Programme found significant improvements in students' social awareness, environmental consciousness, civic responsibility, and community participation. The report recommends expanding similar initiatives to educational institutions nationwide for holistic student development.

Hyderabad: A multi-year statistical evaluation of the COVA Peace Network's Compassionate Citizenship Programme (CCP) has indicated that the initiative had a positive impact on fostering social responsibility and civic consciousness among school students.

The study, taken up between 2022-23, 2023-24, and 2025-26, utilised scientific evaluation methods to track student progress and collect data across pre-implementation, mid-term, and post-programme stages, analysing the data through advanced statistical tools, Mazher Hussain of COVA Peace Network said.

The evaluation revealed progress in all major parameters. The CCP achieved significant improvement in social awareness, strong improvement in environmental consciousness, demonstrated increase in civic responsibility and community participation over the observed periods.

The report has advocated for the implementation of similar citizenship initiatives in various educational institutions nationwide to support holistic student development and overall benefit of society, COVA said.

According to the impact evaluation, students demonstrated greater awareness of social issues, stronger commitment to environmental protection, improved participation in community initiatives, and enhanced leadership qualities.

The final report concludes that the Compassionate Citizenship Program has produced measurable and meaningful improvements in students' awareness, participation, compassion, and responsible citizenship behavior.

The statistical findings strongly support the continuation and expansion of similar citizenship and social awareness programs across educational institutions to promote holistic student development and contribute to the well-being of society and the nation.

As part of the initiative, students also launched a **Plastic-Free Schools Campaign**, highlighting the program's emphasis on environmental responsibility and civic engagement.

Statistical analysis validates impact of COVA's Compassionate Citizenship Program

4 June 2026

HYDERABAD: A statistical analysis of the Compassionate Citizenship Program implemented by COVA Peace Network has found measurable improvements in students' social awareness, environmental consciousness, civic responsibility and community participation.

The assessment was based on data collected through pre-, mid- and post-programme surveys conducted between 2022 and 2026. The analysis measured changes in awareness, attitudes, participation and social responsibility among students who participated in the programme.

According to COVA, the study employed several statistical methods, including frequency distribution analysis, percentage analysis, comparative analysis, the Chi-square test of association, Pearson's Chi-squared test, trend analysis and impact evaluation analysis.

The dimension-wise impact evaluation showed significant improvement in social awareness among students. Environmental consciousness registered strong improvement, while civic responsibility also improved during the study period.

The findings further indicated increased social sensitivity and community participation among students. Leadership development was also found to have improved through participation in the programme.

COVA said the Compassionate Citizenship Program demonstrated measurable gains in students' awareness, participation, compassion and responsible citizenship behaviour.

The organisation stated that the statistical findings support the continuation and expansion of similar citizenship and social awareness programmes across educational institutions. It said such initiatives could contribute to holistic student development and benefit society and the nation.

A detailed statistical analysis report has been made available by COVA on its website.

For a video on students launching the Plastic-Free Schools Campaign, COVA has shared a YouTube link showcasing programme-related activities.
